

**SUCCESS**  
Networking on quality systems to improve student success for all students throughout the world.

**WHO SHOULD JOIN?**

Ready to join the Education Division?

Educators, administrators, business professionals, and others from the public and private sectors throughout the world who want to promote and apply quality principles and practices in all aspects and at all levels (K-12, higher education, and workforce development) to improve the quality of education should join the Education Division.

Call ASQ at 800-248-1946 or go online to [asq.org/join/addforum.html](http://asq.org/join/addforum.html) for more information.

Membership in the Education Division is available in a variety of options; choose the option that best fits your needs and/or those of your organization. The Education Division encourages students to join; ASQ offers a very low Student membership rate and a Division membership of the Student Member's choice is offered at no additional cost.

Help us network on student success. See our Get Involved Web page at [asq.org/edu/interaction/getinvolved-edu.html](http://asq.org/edu/interaction/getinvolved-edu.html).

# Education Division

Making the Right Connections for Quality in Education

The new paradigm of educational leadership calls for collaboration and involvement in leading the educational organization.

—Dr. Jay Marino,  
Education Division  
K-12 Systems Chair

## How will I benefit from joining the Education Division?

# BENEFITS

K-12 educators connect to peers who are using quality tools in their classrooms and increasing the educational success of their students.

Faculty and administrators from higher education explore how to improve their students' learning outcomes and graduation rates, as well as institutional operation. Students find valuable information to enhance their studies.

Workforce development professionals share ideas and best practices, learning how to improve co-workers' performance and their organizations' capabilities.

International educators compare and contrast approaches based on their experience from different countries and share information on how quality assurance is driving many of the changes in national higher education systems.

Learn more about the division's programs and activities at the division's website, [asq.org/edu](http://asq.org/edu), a reliable source of information on quality in education that is available only to division members.

## Connections

The ASQ Education Division connects you to an array of information sources and activities in quality in education. Members are educators and professionals throughout the world who want to apply quality improvement and best practices to k-12 education, higher education, and workforce development.
